## **INTRODUCTION**

This hand-list is devoted to the published writings of Vere Gordon Childe (1892–1957). It was compiled for two reasons: the limitations of earlier lists of his works, and the changing needs of scholars studying Childe and the disciplines to which he contributed.<sup>1</sup>

The earliest and then most complete list of Childe's writings was produced by Isobel Smith for the Childe festschrift published in the *Proceedings of the Prehistoric Society* 21(1956): 295–304. Both Bruce Trigger and Sally Green have added items missed by Smith to the bibliographies of their books on Childe.<sup>2</sup> However, the present bibliography contains over twice as many published items by Childe as have appeared previously.

In general, our list is longer because we have searched especially for political items and for letters to periodicals and reviews by Childe. We have also tried to include all the various editions of Childe's books, although we are conscious that we may have missed editions in languages other than English. Remembering that Childe was almost 30 when he left Australia, and that he returned there after he retired, we have for the first time included his articles and letters published in that country.

The focus of scholarly interest in Childe has changed since his death. Whilst acknowledging the continuing power of his great synthesizing ideas, scholars are finding in Childe an important source for the intellectual history of the first half of

the twentieth century and a guide to some of the current methodological debates in the disciplines of archaeology, anthropology, and history. They are benefiting from the extraordinary range of Childe's thought, his emphasis on clarifying central concepts, and his interest in the theory of knowledge. They are also discovering, as they make the connections between Childe's politics and his career, that his life is a valuable source for the study of twentieth-century intellectuals on the left.

Fortunately, not only is there considerable documentation of Childe's life and writings provided in the memoirs and letters of his contemporaries, but he left an amazingly rich record of his intellectual and political development in his book reviews, his shorter articles, and letters to newspapers and journals, as well as in his unpublished correspondence.

The category of shorter articles and reviews is valuable because it suggests Childe's use of scholarly networks and the extent to which he considered the views and criticisms of his colleagues. It provides clues to his intellectual habits and his attitudes to the normal academic outlets in prehistory and archaeology, for in almost every case Childe's shorter pieces appeared in journals of left-wing political comment and analysis, or in *Past and Present*, which, although a scholarly journal, was founded to present the work of left-wing historians to a wider audience. This was more than political affectation, because sometimes he used these journals to publish more concise and clearer accounts of his major, longer works. On other occasions he took the opportunity to present different versions of an argument. Of course, such practices were not unique to Childe, but in his case we have to take into account not only the political nature of his publishing outlets, but also the ironic and elliptical characteristics of Childe's style in many of his longer academic works.

Some statistics generated by the bibliography: between Childe's first publication in 1915, and 2008, our cut-off year, we made 762 entries for his publications. Books and monographs account for 26 per cent of entries,<sup>3</sup> articles and chapters for 38 per cent, reviews for 31 per cent, and letters and miscellanea for 5 per cent. Apart from books and monographs, Childe was the author of 281 articles or chapters, and 236 reviews. As an example of his prodigious output, Childe published in the 1930s an average of nine articles and nine reviews each year, as well as five new books in the decade. His most prolific years, however, were 1952 and 1954, mainly because of new editions of previously published books. In those years, the total of entries for his books, articles, reviews, and miscellanea was 27 and 26. This was just before he retired. Worldwide recognition of his scholarship continued to increase after his death a year later. For the next 30 years, publishers issued more of Childe's books and monographs than they had in the slightly more than 30 years of his scholarly career. Many of these were translations; our bibliography shows that books and monographs by Childe were translated into 21 languages.

Childe's articles appeared in 99 journals, 85 per cent of which were journals addressing either specialists in archaeology and its cognate fields, or the wider scientific community. There were 23 journals published in languages other than English. The non-scholarly publications included a few popular journals and newspapers (e.g. *The Listener*, *The Week-end Review*, and *Illustrated London News*) but

mostly the press and journals of the political left (e.g. *Daily Worker*, *Labor News*, *The Modern Quarterly*, and *The Plebs*).

Because the bibliography is an historical record of both Childe's work and the continual contemporary interest in his ideas it is arranged year by year to highlight his productivity and the periods when attention to his work was greatest. For this reason also, translations of Childe's publications and Childe's translations of works by other authors are placed with his writings in the appropriate year. There are four sections. In Section I we list Childe's books and monographs, arranged year by year. Section II lists his articles and chapters, also year by year. We have included articles of a political nature and articles in non-academic journals. Section III contains reviews, arranged year by year. Once again, many of the reviews have been gleaned from sources not usually read by academics. Section IV is reserved for letters by Childe published in newspapers and journals, and his other miscellaneous publications.

## ACKNOWLEDGEMENTS

We wish to thank the many colleagues who have provided us with references and suggestions over the years, especially Dr W.J. Peace of New York for his help with works by Childe published in the United States, and Professor J. Makkay for information concerning a posthumous publication by Childe (see 1991). We are very grateful to Dr Margarita Díaz-Andreu for agreeing to consider the bibliography for inclusion in the conference proceedings, and for her discovery of many additional publications in languages other than English.

## NOTES

1. This is a more comprehensive version of a work-in-progress bibliography presented by Peter Gathercole, Terry Irving, and W.J. Peace to the Childe Centenary Conference held at the University of Queensland, in September, 1990; it was digitized subsequently by Nick Irving. See P. Gathercole, T.H. Irving and G. Melleuish (eds), 1995 *Childe and Australia: Archaeology, Politics and Ideas* (St Lucia, Qld: University of Queensland Press).

2. B.G. Trigger (1980), *Gordon Childe: Revolutions in Archaeology* (London: Thames & Hudson); S. Green (1981), *Prehistorian: a Biography of V. Gordon Childe* (Bradford-on-Avon: Moonraker Press). As a matter of interest, Green records on p.144 of her book that Childe's will directed that royalties from his publications would go to the Institute of Archaeology, University of London.

3. This calculation is based on 206 entries for books and monographs. It ignores 47 reprints, including 11 of *What Happened in History* by Penguin and Peregrine Books (see hand-list, section 1, 1964), 17 of the Mexican edition of *Man Makes Himself* (see Section 1, 1954), and 19 other reprints in languages other than English of his major works.
